

Assembly Instructions for the Revv 1 Center Storage Cage

Materials Needed

- Ride1Up Hex Keys
- Pre-Built Revv Storage Cage
- Flat Screws

Step 1: Remove Storage Cage from the Box

1. Remove the storage case and lay it on a flat surface.
2. Remove the four preinstalled hex screws on top of the controller box.
3. Save the existing hardware for installation or use provided hardware.

Step 2: Secure Storage Cage

1. Align the storage case and ensure pre-drilled holes are lined up with the Controller box.
2. Using supplied flat screws, thread into the controller box, tighten until flush with the storage case.

Step 3: Setting a unique code for the Center Storage Cage combination lock

1. Note: Pre-set code is 000.
2. Push the small silver code setting pin on the side of the circular dial in with a small instrument or screwdriver.
3. Set your desired code
4. Remove the screwdriver, allowing the setting pin to return to place.

Final Steps & Important Notes

- Ensure the cage is secure and tight by gently moving the cage.
- Periodically check the flat screws to ensure they are secure to the controller box.
