

This Connect+ Cooler is compatible with any model that advertises the Connect+ system. It will connect to the following bike/accessories:

- *Cafe Cruiser (directly to integrated rear rack)*
- *Portola (directly to integrated rear rack)*
- *700 Series (rear rack with Connect+ logo only)*
- *Prodigy v2 (directly with included rear rack) *do not exceed the rack's 40 lb limit**
- *Rift (directly to integrated rear rack)*
- *Revv1 Connect+ Rear Rack and Handle*
- *Ride1Up Rear Rack (separate purchase – ONLY fits CF Racer1, Core-5, Turris, LMT'D and LMT'D V2)*
- *Roadster v3 Connect+ Rear Rack (separate purchase)*

Materials Needed

- Insulated Cooler
- Phillips Head Screwdriver
- Included Hardware
- Preassembled Connect+ Attachment

Step-by-Step Instructions

Step 1: Unpack the cooler and the Connect+ attachment mechanism

1. Align the Connect+ attachment with 4 of the 6 inserts for best fit with your rack
2. Using the included hardware, attach the Connect+ latch using the 4 screws and screwdriver.

Step 2: Unzip the cooler and align with Connect+ Rack

3. Align the cooler with your Connect+ compatible rack
4. Ensure that the Connect+ latch spring is resting against the rack connection point.

Step 3: Attach the Cooler to Your Bike

Firmly push down through the center of the opened cooler until you hear the Connect+ latch click.

Step 4: Removing the Cooler

1. To remove the cooler, pull the Connect+ latch located under the cooler away from the rack connection point.
2. Lift the cooler off the rack.

Final Steps & Review

- Ensure the cooler is secure and the latch attachment is locked into place before every ride by pulling gently to confirm it is locked in place.
- It is recommended not to exceed 15 lbs in weight capacity for the Connect+ Cooler.
